Galvanised Steel Scaffold Tube 420N/mm2 quality 6.4kg/m Weight

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Bythai Scaffolding
- Certification: SGS
- Model Number: BT205
- Minimum Order Quantity: 1000
- Price: $5-$18
- Packaging Details: container
- Delivery Time: 7-15 days
- Payment Terms: TT/LC
- Supply Ability: 1000tons per month

Product Specification

- Diameter: 48.3mm
- Standard: EN39
- Length: 6m
- Thickness: 3.2mm
- Corrosion Resistance: Excellent
- Application: Scaffolding
- Material: Galvanised Steel
- Tensile Strength: 420N/mm2
- Highlight: **Galvanized Scaffolding Pipe**, **Metal Galvanised Scaffold Tube**

Product Description

Product Description:

Galvanised Scaffolding Tube is a hi-tech construction material that is made of high-quality galvanised steel. It is designed to provide superior strength and durability for scaffolding projects. This material has a thickness of 3.2mm and is galvanised for superior corrosion resistance. The galvanised steel scaffold tube has a yield strength of 245N/mm2, making it an ideal choice for scaffolding projects. The galvanised steel scaffolding tube is designed to be easy to install and to be able to withstand the toughest of conditions. It is a reliable and cost-effective solution for scaffolding projects, making it an ideal choice for any construction project.

Technical Parameters:

Property	Value
Length	6m
Elongation	>20%

Material	Galvanised Steel
Bending Radius	>2.5D
Thickness	3.2mm
Corrosion Resistance	Excellent
Application	Scaffolding
Surface Treatment	Galvanised
Yield Strength	245N/mm2
Diameter	48.3mm

Applications:

Bythai Scaffolding's Galvanised Steel Scaffold Tube (Model Number BT01) is a perfect choice for various applications, certified by SGS and made in China. This product comes with reasonable price range of $5-$18, and can be shipped in bundles. Delivery time is 7-15 days, with TT/LC payment terms. The supply ability is up to 1000tons per month. This Galvanised Steel Scaffold Tube is 6.4kg/m in weight, with 3.2mm thickness, 6m length, 245N/mm2 yield strength and >2.5D bending radius.

Support and Services:

Galvanised Scaffold Tube provides comprehensive technical support and service for all customers. Our technical staff are experienced and knowledgeable and can provide professional advice and assistance. We provide support for installation, maintenance, troubleshooting, and repair of all products. Our technical support team is available 24/7 and can be contacted via telephone, email, or live chat.
We also have an extensive library of online resources and tutorials to help customers understand the products and services. Additionally, we offer on-site visits and training to ensure customers are fully equipped to use the products effectively.

Packing and Shipping:

Galvanised Scaffold Tube packaging and shipping:
The Galvanised Scaffold Tubes are packaged in bundles of 5-6 pieces. The bundles are then shrink-wrapped on pallets for easy shipping. All pallets are fully secured and are built to the highest standards. The palletised bundles are then shipped in containers or by truck, depending on the quantity. All shipments are tracked and monitored for quality and safety.

Scaffolding steel pedals are an important part of ensuring construction safety and efficiency. They have the advantages of durability, anti-skid, easy installation and multi-functional application. They can provide workers with a stable and reliable standing platform and provide necessary support for various construction and engineering projects. . Choose our products, choose quality and trust!
