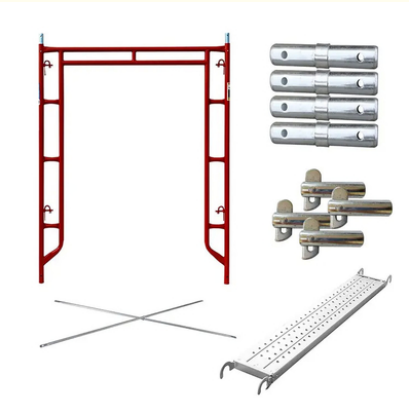
# High Load Capacity Cost-effective Walk Through Scaffold System for Easy Dismantling

Our Product Introduction

## Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Model Number: BT04



## Product Specification

- Durability: High
- Load Capacity: High
- Cost-effectiveness: Yes
- Easy Dismantling: Yes
- Easy Installation: Yes
- Surface Treatment: Powder Coating
- Material: Steel
- Size: Customized
- Highlight: **Walk Through Scaffold System**, **Steel Frame System Scaffolding**

## Product Description

### Product Description:

**Frame System Scaffolding** is a high-quality scaffolding frame system that is designed to meet the highest safety standards. It is made from durable steel, with an option to have it painted in any color. It is fully customizable in size, allowing you to design the perfect frame for your needs. The high-grade stainless steel ensures that the frame is resistant to rust and corrosion, providing a long-lasting solution. Moreover, it has a high load capacity and is strong enough to support heavy loads. All in all, this scaffolding frame system is designed for maximum safety, strength, and versatility, making it an ideal choice for any scaffolding project.

### Features:

Product Name: Frame System Scaffolding
Easy Installation: Yes
Easy Dismantling: Yes
Surface Treatment: Powder Coating
Load Capacity: High
Flexibility: High
Scaffold Mobile Frame: Yes
Scaffolding System for Construction: Yes
Scaffold Mobile Frame System: Yes

### Technical Parameters:

| Attribute | Description |
|---|---|
| Surface Treatment | Powder Coating |
| Durability | High |
| Safety | High |
| Cost-effectiveness | Yes |
| Easy Dismantling | Yes |
| Load Capacity | High |
| Material | Steel |
| Weight | Lightweight |
| Color | Steel, Painted Color |
| Flexibility | High |
| Frame System | Ladder Frame, Frame Scaffolding System, H Frame |

### Applications:

Bythai BT04 Ladder Frame Scaffolding System

The Bythai BT04 ladder frame scaffolding system is designed to provide a safe and secure platform for working at height. It is lightweight yet offers a high load capacity and stability to support workers and their materials. The steel frame is powder coated for durability and long-lasting use, and comes in a variety of painted colors.
The BT04 ladder frame system is designed to fit any job, small or large. It is quick and easy to install, and the adjustable height makes it suitable for any project. With its unique design, the ladder frame scaffolding provides a secure platform with superior stability.
The Bythai BT04 ladder frame scaffolding system is ideal for construction, renovation, repair, and maintenance projects of any size. It is ideal for both indoor and outdoor use, and is the perfect solution for any project that requires safe and secure access to elevated heights.

### Customization:

Bythai Frame System Scaffolding (BT04)

The Bythai Frame System Scaffolding (BT04) is a high-performance, durable and highly flexible walk-through scaffolding system. It is made of heavy-duty steel and is designed to offer superior load capacity with a powder-coated surface for a longer lifespan and superior

reusability. It is resistant to corrosion and offers high durability.

## Support and Services:

**Frame System Scaffolding Technical Support and Services:**
We provide technical support and services for Frame System Scaffolding, so you can use it with confidence. Our team of experienced technicians can help you with:

Installing and configuring the software

Troubleshooting any technical issues

Answering any questions you have about the product

Providing ongoing maintenance and updates

We also offer extended support and services, including customizing the software to meet your specific needs.
For more information, please contact our support team at support@frame-system.com.

## Packing and Shipping:

Packaging and Shipping for Frame System Scaffolding

Frame System Scaffolding products are packaged and shipped in accordance with the following guidelines:

All items must be securely packaged to prevent damage during transit.

All items must be clearly labelled with the correct shipping address.

All items must be shipped via a reliable and insured method.

All items must be inspected upon receipt to ensure they are in good condition.

## FAQ:

Q1: What is Frame System Scaffolding?

A1: Frame System Scaffolding is a product by Bythai (Model Number: BT04), made in China, mainly used in the construction industry for support and stabilization.

Q2: What are the main components of Frame System Scaffolding?

A2: The main components of Frame System Scaffolding are frames, guardrails, braces, couplers, base jacks, and other accessories.

Q3: What is the loading capacity of Frame System Scaffolding?

A3: The loading capacity of Frame System Scaffolding depends on the size and weight of the structure, as well as the type of materials being used. Generally, it can support up to 800 kg.

Q4: Does Frame System Scaffolding require any special tools for installation?

A4: No, Frame System Scaffolding does not require any special tools for installation. It can be easily assembled and disassembled by using standard couplers and wrenches.

Q5: How long does Frame System Scaffolding last?

A5: With proper care and maintenance, Frame System Scaffolding can last for many years. The actual lifespan will depend on the environment it is exposed to and the frequency of use.
