Product Description

Product Description:

Frame System Scaffolding

Frame System Scaffolding is a reliable and versatile **h frame walk through scaffold system** designed for maximum safety, stability and load capacity. It is made of high quality steel and designed for easy installation. The frame system scaffolding is highly durable and provides high load capacity with superior stability. The frame system scaffolding is designed to ensure maximum safety and is tested to meet international safety standards. Its easy installation makes it an ideal choice for any construction project. With its reliable and versatile design, the frame system scaffolding is the perfect choice for any construction project.

Features:

Product Name: Frame System Scaffolding
Color: Steel, Painted Color
Cost-effectiveness: Yes
Stability: High
Flexibility: High
Reusability: Yes
Walk Through Scaffold System: American Frame
Scaffolding Frame System: Yes

Technical Parameters:

Parameter	Description
Product	Scaffold Mobile Frame, American Frame, Ladder Frame
Stability	High
Safety	High
Durability	High
Material	Steel
Surface Treatment	Powder Coating
Weight	Lightweight
Flexibility	High
Color	Steel, Painted Color
Size	Customized
Cost-effectiveness	Yes

Applications:

Bythai Frame System Scaffolding - BT04

Bythai Frame System Scaffolding is the perfect choice for contractors and homeowners looking for a lightweight, yet highly stable and flexible scaffolding solution. With its American Frame design, it provides a safe and efficient way to quickly walk through scaffolding construction sites.
