Usage	Construction

Applications:

Scaffolding steel prop tripods, also known as adjustable steel props, are becoming widely used in the construction industry. The BM211 model of this product is known for its reliable performance and a minimum order quantity of 1500. With a price range of 4.5-8.5, these steel props can be used to support a wide variety of construction projects with a strong, durable material that can withstand the rigors of any environment. The steel props also feature a HDG surface treatment, ensuring that the material remains corrosion resistant and offers superior protection against any elements. These steel props are easy to assemble and adjust depending on the desired height, and their heavy-duty design ensures that your construction project is supported for years to come.

Support and Services:

Adjustable Steel Prop offers a comprehensive technical support and service plan to ensure the highest levels of satisfaction for our customers. Our team of experienced professionals are available to assist you with product installation, maintenance, and troubleshooting. We provide on-site support to help with assembly and installation of our products. Our technicians can also help diagnose any issues, provide advice on product maintenance, and suggest improvements to get the most out of the Adjustable Steel Prop. To ensure our customers receive the best possible service, we offer a 24/7 customer service line. Our customer service team will provide timely responses to any inquiries you may have about our products and services. We also offer a variety of online resources, including product manuals, installation guides, and troubleshooting tips. Our website also contains a detailed FAQ page to answer any questions you may have regarding the Adjustable Steel Prop.

Packing and Shipping:

Adjustable Steel Prop Packaging and Shipping:

The Adjustable Steel Prop comes in a cardboard box.

The box is then sealed with a plastic wrap for protection.

The box is then placed in a larger shipping box with bubble wrap for added protection.

The shipping box is then sealed and labeled with the shipping address.

The shipping box is then sent via a reliable courier service.
