Product Description

Product Description:

Scaffolding Step Ladders is a load-bearing ladder made of aluminum and is designed to provide a safe and convenient access to elevated areas. It is treated with HDG technology, making it stronger and more durable than other ladders. It has a maximum load capacity of 150kg, and each step has a height of 30cm and a width of 50cm. The surface is treated with HDG, which is highly resistant to corrosion and rust, and ensures the longevity of the ladder. With strong load capacity, efficient structure, and attractive silver color design, Scaffolding Step Ladders provide a safe and reliable access for the users.

Applications:

Introducing the bythai BM224 Scaffolding Mounting Ladders, an aluminum ladder designed with a strong bearing capacity and a ladder with hook. This product has a step width of 50cm, step height of 30cm, and is available in a silver color. The minimum order quantity for this product is 1000, and it can be shipped by container. With a delivery time of 10-25 days, this product also comes with a 2 year warranty. Get the perfect size for you with the 3m bythai BM224 Scaffolding Mounting Ladders.

Packing and Shipping:

Packaging and Shipping Scaffolding Ladders
Scaffolding ladders are typically packaged in cardboard boxes, bubble wrap or foam, and then shipped in a wooden crate. The crate should be designed to protect the ladders during shipping and should be large enough to allow for sufficient padding within. It is important to ensure that the ladders are secured within the crate in order to minimize movement during transit.
In order to properly package and ship scaffolding ladders, it is essential to use the right materials and follow appropriate safety guidelines. Careful consideration should be given to the design of the package and the type of shipping method used. The ladders should be properly secured in the packaging and crate to ensure they are adequately protected and arrive safely.
