

Q235 Steel Ringlock Scaffolding Safe and Stable Construction Projects

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Certification: SGS
- Model Number: BM202
- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: TT/TC

Product Specification

- Application Scenarios: Architecture
- Product Name: Ringlock System
- Shipping Origin: China
- Material: Q235 Steel
- Warranty: 2 Years
- Surface Treatment: Hot-dip Galvanized

Product Description

Product Description:

Ringlock System Scaffolding

The Ringlock System Scaffolding is a high-quality scaffold connector that is widely used in the construction industry for its durability and versatility. This innovative scaffolding system is designed to provide a safe and efficient solution for various construction projects, including architecture, bridge construction, and industrial maintenance.

Product Overview

The Ringlock System Scaffolding is made of high-strength steel with a hot-dip galvanized surface treatment, ensuring long-lasting protection against rust and corrosion. The hot-dip galvanization process involves coating the steel with a layer of zinc, providing superior protection against harsh weather conditions and extending the lifespan of the scaffolding.

This product comes with a 2-year warranty, giving customers peace of mind and confidence in the quality and reliability of the Ringlock System Scaffolding.

Product Name

The product is named Ringlock System Scaffolding due to its unique ringlock rosette design. This design allows for easy and secure connection between different scaffold components, providing a stable and safe working platform for workers.

Shipping Origin

The Ringlock System Scaffolding is manufactured in China, a country known for its advanced technology and high-quality construction materials. Our factory is equipped with modern machinery and strict quality control measures, ensuring that every product meets the highest standards.

Application Scenarios

The Ringlock System Scaffolding is suitable for various construction projects, especially in architecture. It can be used for building construction, renovation, and maintenance works. Its versatility and durability make it an ideal choice for both indoor and outdoor applications.

Emphasized Keywords

This product highlights the following keywords:

Quality Scaffold Connector

Ringlock Rosette

Scaffold Coupler System

The Ringlock System Scaffolding stands out in the market with its high-quality scaffold connector and innovative ringlock rosette design. Its compatibility with various scaffolding accessories makes it a versatile and efficient choice for any construction project. Trust in the Scaffold Coupler System and choose the Ringlock System Scaffolding for your next construction project. Contact us now for more information and a free quote!

Technical Parameters:

Attribute	Value
Product Name	Ringlock System
Material	Q235 Steel
Surface Treatment	Hot-dip Galvanized
Compliant Scaffolding Standards	EN12810, ANSI/SSFI SC100-5/05, AS/NZS 1576.3
Hot Dip Galvanized Ringlock	Yes
Ringlock Rosette	Yes
Warranty	2 Years
Shipping Origin	China
Application Scenarios	Architecture

Applications:

Ringlock System Scaffolding: The Perfect Solution for Versatile and Efficient Architectural Construction

The Ringlock System Scaffolding, manufactured by the reputable brand Bythai, is a revolutionary product that has taken the construction industry by storm. With its innovative design and exceptional features, the BM202 model has become the go-to choice for architects, engineers, and construction workers around the world. Made from high-quality Q235 steel and certified by SGS, this product guarantees durability and safety in all types of construction projects.

Ideal for Architecture

The Ringlock System Scaffolding is specifically designed for architectural projects, making it the perfect choice for any construction company. Whether it's small-scale residential buildings or large-scale commercial complexes, this product is versatile and adaptable, making it suitable for a wide range of applications. Its flexible design allows it to be used for various architectural structures such as

bridges, stadiums, and even skyscrapers.

Innovative Ring Lock Design

One of the most impressive features of the Ringlock System Scaffolding is its innovative ring lock design. This unique design ensures that the scaffolding is easy to assemble and disassemble, making it a time-saving and efficient solution for construction projects. The ring lock design also provides a secure and stable structure, ensuring the safety of workers and the stability of the scaffolding.

Soporte Diagonal Ringlock for Extra Stability

To further enhance the stability of the scaffolding, the Ringlock System features a Soporte Diagonal Ringlock. This diagonal support system provides additional support and stability, allowing for a higher load capacity and ensuring the safety of workers. With this feature, the scaffolding can withstand heavy weights and strong winds, making it suitable for use in various weather conditions.

Fast and Efficient Assembly

The Ringlock System Scaffolding is designed to be assembled quickly and efficiently. With its unique design and lightweight materials, it can be set up in a fraction of the time compared to traditional scaffolding. This feature not only saves time but also reduces labor costs, making it a cost-effective solution for construction companies.

Flexible and Adaptable

One of the biggest advantages of the Ringlock System Scaffolding is its flexibility and adaptability. The scaffolding can be adjusted to fit different heights and shapes, making it suitable for a wide range of construction projects. This feature also allows for easy maneuverability, making it easy to use in tight spaces or around obstacles.

Stable and Durable

Made from high-quality Q235 steel, the Ringlock System Scaffolding is built to last. Its corrosion-resistant properties make it suitable for use in different weather conditions, ensuring its durability and longevity. This product is also designed to withstand heavy loads, making it a reliable and stable choice for construction projects.

High Load Capacity for Heavy-Duty Construction

The Ringlock System Scaffolding has a high load capacity, making it ideal for heavy-duty construction projects. Its stable and durable design allows it to withstand heavy weights, making it suitable for use in the construction of bridges, large buildings, and other structures that require high load-bearing capacity.

Safe and Secure for Workers

Safety is a top priority in any construction project, and the Ringlock System Scaffolding ensures the safety of workers at all times. With its stable and secure design, workers can perform their tasks without worrying about the scaffolding collapsing or shifting. This product also comes with a 2-year warranty, providing peace of mind for construction companies and workers.

Time-Saving and Cost-Effective Solution

Customization:

Customized Service | Bythai Ringlock System Scaffolding

Brand Name: Bythai

Model Number: BM202

Place of Origin: China

Certification: SGS

Price: 4.5-8.5

Packaging Details: In bundles

Delivery Time: 10-15

Payment Terms: TT/TC

Warranty: 2 Years

Material: Q235 Steel

Shipping Origin: China

Product Name: Ringlock System Scaffolding

Application Scenarios: Architecture

At Bythai, we understand that every project is unique and requires specialized solutions. That is why we offer a customized service for our innovative Ringlock System Scaffolding.

Our Ringlock System features an innovative design that allows for quick and easy assembly, saving you time and labor costs. The Soporte Diagonal Ringlock provides additional stability and strength to the scaffolding structure.

We use Q235 steel material, ensuring durability and strength for your scaffolding needs. Our products are certified by SGS, ensuring high-quality standards.

With our customized service, we can tailor our Ringlock System to meet your specific project requirements. We provide a 2-year warranty for our scaffolding, giving you peace of mind and confidence in our products.

Our Ringlock System Scaffolding is perfect for architecture applications, providing a safe and stable platform for construction and maintenance.

Packing and Shipping:

Packaging and Shipping for Ringlock System Scaffolding

Our Ringlock System Scaffolding is carefully packaged and shipped to ensure safe delivery to our customers. Here is a breakdown of our packaging and shipping process:

Packaging

Each individual component of our Ringlock System Scaffolding is packed in high-quality, sturdy cartons to protect them from damage during transportation. The cartons are labeled with clear product information and instructions for easy identification and assembly.

Shipping

Once the scaffolding components are packed, they are loaded onto pallets and securely strapped to prevent any movement during shipping. We work with reliable and experienced shipping companies to ensure timely and efficient delivery to our customers.

For international orders, we adhere to all necessary customs regulations and provide all required documentation to facilitate smooth delivery. Our team closely monitors the shipping process to promptly address any issues that may arise.

Delivery Options

We offer a variety of delivery options to suit our customers' needs, including standard ground shipping, expedited shipping, and international shipping. Our sales team will work with you to determine the best delivery option based on your location and timeline.

Assembly Instructions

Along with the scaffolding components, we also provide detailed assembly instructions to guide our customers through the setup process. Our instructions are available in multiple languages for easy understanding. Thank you for choosing our Ringlock System Scaffolding. We are committed to providing you with high-quality products and efficient delivery. If you have any further questions or concerns about our packaging and shipping process, please don't hesitate to contact us.

FAQ:

Q: What is the brand name of this product?

A: The brand name of this product is Bythai.

Q: What is the model number of this product?

A: The model number of this product is BM202.

Q: Where is this product made?

A: This product is made in China.

Q: Is this product certified?

A: Yes, this product is certified by SGS.

Q: What is the price range of this product?

A: The price range of this product is 4.5-8.5.

Q: How is this product packaged?

A: This product is packaged in bundles.

Q: How long is the delivery time for this product?

A: The delivery time for this product is 10-15 days.

Q: What are the available payment terms for this product?

A: The available payment terms for this product are TT/TC.
