

## Japanese Scaffold Accessories High Strength for Construction Efficiency

Our Product Introduction

for more products please visit us on [bythaiscaffold.com](http://bythaiscaffold.com)

### Basic Information

- Place of Origin: china tianjin
- Brand Name: scaffolding coupler
- Certification: SGS
- Model Number: BM201
- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 15-25
- Payment Terms: TT/TC

### Product Specification

- Name: Scaffolding Coupler
- Package: Container
- MOQ: 1000
- Color: Silver
- Standard: EN74-1
- Material: Steel
- Surface Treatment: Galvanized
- Feature: High Strength
- Highlight: **EN74-1 Japanese Scaffold Accessories,  
Japanese Galvanized Scaffold Accessories**

## Product Description

### Product Description:

#### Scaffolding Coupler

If you are looking for reliable and durable scaffold connectors, look no further than our Scaffolding Coupler. As a leading Manual Scaffold Connection Tools supplier, we are committed to providing high-quality products that meet the needs of our customers.

#### Product Overview

Scaffolding Coupler is a steel structure scaffold connector that is used for manual scaffold connection. It is designed to provide a strong and secure connection between scaffolding components, ensuring the safety of workers and the stability of the scaffold structure.

#### Key Features

**High Strength:** Our Scaffolding Coupler is made of high-quality steel, making it strong and durable. It can withstand heavy loads and provide a stable connection for scaffolding structures.

**Durable Scaffold Clamp:** The coupler is designed to last for a long time, even in harsh working conditions. It is resistant to rust and corrosion, ensuring its durability and reliability.

**Galvanized Surface Treatment:** To provide added protection against corrosion, our Scaffolding Coupler is coated with a galvanized surface treatment. This makes it suitable for use in both indoor and outdoor construction projects.

**Silver Color:** The coupler comes in a sleek silver color, making it easy to spot and identify on the scaffold structure. It also gives a professional and clean look to the scaffolding system.

#### Minimum Order Quantity (MOQ)

To ensure the best quality and value for our customers, we have set the MOQ for our Scaffolding Coupler at 1000 pieces. This quantity allows us to maintain the high standards of our product and provide competitive pricing.

#### Ordering Information

To place an order for our Scaffolding Coupler, please contact us with your requirements and we will be happy to assist you. We offer flexible payment options and timely delivery of our products.

#### Conclusion

In conclusion, our Scaffolding Coupler is a reliable and durable scaffold connector that is ideal for all types of construction projects. With its high strength, galvanized surface treatment, and silver color, it is a valuable addition to any scaffold system. Contact us today to order yours and experience the quality and performance of our Manual Scaffold Connection Tools.

Technical Parameters:

Technical Parameters	Scaffolding Coupler
Application	Construction
Feature	High Strength
Standard	EN74-1
Material	Steel
Surface Treatment	Galvanized
Package	Container
Color	Silver
Name	Scaffolding Coupler
MOQ	1000
British Scaffold Tube Clamps	High-Quality British Couplers
Japanese Steel Pipe Connectors	High-Quality British Couplers

Applications:

Scaffolding Coupler

Scaffolding coupler is a key component of any scaffolding system, providing a secure connection between scaffolding tubes. It is also known as coupler scaffolding or British Scaffold Tube Clamps. The scaffolding coupler is designed to ensure the safety and stability of construction and building projects, making it an essential tool for any construction site.

The scaffolding system is widely used in various construction projects, such as building construction, bridge construction, and maintenance work. This system consists of different components, and the scaffolding coupler is one of the most important ones. It is used to connect scaffolding tubes together, creating a stable and strong structure for workers to stand on and work safely.

Easy Installation and High-Quality

The scaffolding coupler is designed for easy installation, making it a popular choice among construction workers. With its simple and efficient design, it can be easily attached to scaffolding tubes without the need for additional tools. This not only saves time but also increases efficiency on the construction site.

Moreover, the scaffolding coupler is made of high-quality steel material, ensuring its durability and strength. It can withstand heavy loads and harsh environments, making it suitable for various construction projects. This high-quality material also makes it resistant to corrosion, extending its lifespan and making it a cost-effective choice for construction companies.

Adjustable and Secure

The scaffolding coupler is designed to be adjustable, providing flexibility in terms of height and width. This feature makes it suitable for

different types of scaffolding systems and allows for easy customization according to the specific needs of a construction project. Furthermore, the scaffolding coupler is designed to provide a secure connection between scaffolding tubes, ensuring the safety of workers. With its strong grip and tight fit, it prevents any movement or slipping of the scaffolding tubes, providing a stable and safe platform for workers to perform their tasks.

Versatile and Efficient

The scaffolding coupler is a versatile product that can be used in various construction projects. Its adjustable and secure features make it suitable for different types of scaffolding systems, including single scaffolding, double scaffolding, and cantilever scaffolding. This versatility makes it a valuable tool for construction companies, as it can be used in different projects without the need for additional equipment.

Moreover, the scaffolding coupler increases efficiency on the construction site. With its easy installation and secure connection, it allows workers to focus on their tasks without worrying about the stability of the scaffolding structure. This not only saves time but also reduces the risk of accidents, making it an essential tool for any construction project.

SGS Certified and Galvanized Surface Treatment

The scaffolding coupler is certified by SGS, a leading global inspection, verification, testing, and certification company. This certification ensures the quality and safety of the product, giving customers peace of mind and confidence in its performance.

Moreover, the scaffolding coupler undergoes a galvanization process, which involves coating it with a layer of zinc to protect it from corrosion. This surface treatment makes it suitable for outdoor use and increases its durability, making it a reliable and long-lasting product.

Container Package and Tianjin, China Origin

The scaffolding coupler is packaged in bundles and shipped in containers, making it easy to transport and store. This packaging method also ensures that the product is protected from any damage during transit, maintaining its quality and performance.

The scaffolding coupler is made in Tianjin, China, a leading industrial city known for its high-quality steel production. This origin further emphasizes the product's quality and reliability, making it a trusted choice for construction companies worldwide.

Product Information:

Brand Name: Scaffolding Coupler

Model Number: BM201

Place of Origin: Tianjin, China

Certification: SGS

Price: \$4.5-8.5

Packaging Details: Bundles

Delivery Time: 15-25 days

Payment Terms: TT/TC

Name: Scaffolding Coupler

Surface Treatment: Galvanized

MOQ: 1000 pieces

Material: Steel

Package: Container

Customization:

Scaffolding Coupler Customization Service

Brand Name: Scaffolding Coupler

Model Number: BM201

Place of Origin: China Tianjin

Certification: SGS

Price: 4.5-8.5

Packaging Details: In bundles

Delivery Time: 15-25 days

Payment Terms: TT/TC

Standard: EN74-1

Name: Scaffolding Coupler

Surface Treatment: Galvanized

Package: Container

Application: Construction

Key Features: British Scaffold Fixtures, Steel Structure Scaffold Connectors, BS1139 Standard Couplings

Packing and Shipping:

Introduction

The packaging and shipping of Scaffolding Coupler is an important aspect to consider for ensuring the safe and efficient delivery of the product to customers. This document outlines the packaging and shipping details for Scaffolding Coupler.

Packaging

The Scaffolding Coupler will be packaged in sturdy and durable cardboard boxes, ensuring the safety of the product during transit. Each box will contain a set of 10 couplers, securely packed and labeled for easy identification.

Shipping

The Scaffolding Coupler will be shipped using trusted and reliable shipping carriers such as DHL, UPS, and FedEx. The choice of carrier will depend on the destination and customer preferences. The shipping cost will be calculated based on the weight and volume of the package.

The estimated delivery time will be provided to the customer at the time of purchase and may vary depending on the shipping method and destination. Customers can also opt for expedited shipping at an additional cost.

Handling and Storage

It is important to handle and store the Scaffolding Coupler with care to avoid any damage. The couplers should be kept in a dry, clean, and well-ventilated area to prevent rust and corrosion. They should also be stored away from any sources of heat or direct sunlight.

Conclusion

The packaging and shipping process for Scaffolding Coupler is designed to ensure the safe and timely delivery of the product to our customers. We strive to provide the highest quality products and services to our customers, and we are committed to making the

packaging and shipping process as smooth and efficient as possible.
