

Scaffolding Coupler With High Strength Performance Forged Double Coupler

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: china tianjin
- Brand Name: scaffolding coupler
- Certification: SGS
- Model Number: BM201
- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 15-25
- Payment Terms: TT/TC

Product Specification

- MOQ: 1000
- Color: Silver
- Material: Steel
- Application: Construction
- Name: Scaffolding Coupler
- Feature: High Strength
- Standard: EN74-1
- Surface Treatment: Galvanized
- Highlight: **Galvanized Forged Scaffolding Coupler, Forged Double Coupler**

Product Description

Product Description:

Scaffolding Coupler - A Universal Scaffold Clamping Tool

The Scaffolding Coupler is a vital component in the construction industry, used for connecting and securing scaffolding tubes together to form a sturdy and reliable structure. As one of the leading British Coupler Manufacturers, we take pride in providing high-quality, durable and efficient couplers for all your scaffolding needs.

Our Scaffolding Coupler is designed and manufactured to meet the Standard: EN74-1, ensuring its compatibility and compliance with international safety standards. This makes it a reliable and trusted choice for construction projects worldwide.

With a Minimum Order Quantity (MOQ) of 1000, our Scaffolding Coupler is suitable for large-scale projects and can be easily ordered in bulk. We understand the importance of timely delivery and strive to meet your requirements with our efficient production and delivery process.

Made from high-quality steel, our Scaffolding Coupler is strong, durable and able to withstand heavy loads. The material is carefully selected to ensure maximum strength and longevity, making it a cost-effective investment for your construction projects.

As safety is our top priority, our Scaffolding Coupler undergoes a rigorous surface treatment process of galvanization. This not only enhances its durability but also protects it from corrosion and rust, making it suitable for use in various weather conditions.

The name itself speaks for its purpose - Scaffolding Coupler. It is designed to easily and securely connect scaffolding tubes, eliminating the need for additional tools or equipment. Its universal design allows for quick and efficient installation, making it a preferred choice for construction sites.

In conclusion, the Scaffolding Coupler is a must-have for any construction project. Its compatibility with the Standard: EN74-1, high-quality steel material, galvanized surface treatment, and universal design make it a reliable and efficient choice for all your scaffolding needs. Trust us, the leading British Coupler Manufacturers, to provide you with the best Universal Scaffold Clamping Tool for your construction projects.

Order your Scaffolding Coupler today and experience the difference it makes in your construction process!

Standard: EN74-1

MOQ: 1000

Material: Steel

Surface Treatment: Galvanized

Name: Scaffolding Coupler

Technical Parameters:

Feature	High Strength
Name	Scaffolding Coupler
Material	Steel
Package	Container
MOQ	1000
Surface Treatment	Galvanized
Color	Silver
Application	Construction
Standard	EN74-1, JIS Standard Couplings, Scaffold Beam Connectors, BS1139 Standard Couplings

Applications:

Scaffolding Coupler - BM201

Scaffolding Coupler is a high-quality British Scaffold Fixture that provides a safe and sturdy connection between scaffolding structures. It is designed and manufactured in China Tianjin with strict adherence to the EN74-1 standard and has been certified by SGS, ensuring its reliability and durability.

Our scaffolding coupler is made of high-quality steel material and goes through a galvanization process to prevent rust and corrosion, making it suitable for both indoor and outdoor use. Its sturdy and durable construction allows it to withstand heavy loads and harsh environments, providing a safe and secure scaffolding system for workers.

The British Scaffold Fixtures are easy to use, making it a popular choice among workers in the construction industry. It is designed to connect scaffolding tubes quickly and securely, saving time and effort. With its simple and efficient design, it can be used by anyone, regardless of their experience level.

Our scaffolding coupler is suitable for various scaffolding systems and structure connectors, making it a versatile tool for different construction needs. It is commonly used in building constructions, bridge constructions, shipbuilding, and other industrial projects.

Packing and Shipping:

Package and Shipping of Scaffolding Coupler

Our Scaffolding Couplers are carefully packaged to ensure safe delivery to our customers. Each coupler is wrapped in protective material and placed in a sturdy cardboard box. The boxes are then sealed and labeled with the product name, quantity, and any other necessary information.

For larger orders, the couplers are packed in wooden crates to provide extra protection during transportation. Each crate is also labeled with the product information and secured for safe delivery.

We offer various shipping options to our customers, including air, sea, and land transportation. The method of shipping will depend on the location and preference of the customer. We work closely with trusted shipping companies to ensure timely and efficient delivery of our products.

Upon delivery, our customers can expect their Scaffolding Couplers to be in excellent condition. In the unlikely event of any damage during transit, we have a dedicated customer service team to assist with any issues and provide a satisfactory resolution.

Thank you for choosing our Scaffolding Couplers. We strive to provide the best packaging and shipping services to ensure a smooth and secure delivery of our products to your doorstep.
