

## Versatile Scaffold Tube With 3.2mm Thickness And 6.4kg/M For Construction

Our Product Introduction

for more products please visit us on [bythaiscaffold.com](http://bythaiscaffold.com)

### Basic Information

- Place of Origin: China
- Brand Name: Bythai Scaffolding
- Certification: SGS
- Model Number: BT01
- Price: \$5-\$18
- Packaging Details: In bundles
- Delivery Time: 7-15 days
- Payment Terms: TT/LC
- Supply Ability: 1000tons per month

### Product Specification

- Weight: 6.4kg/m
- Standard: EN39
- Surface Treatment: Galvanised
- Yield Strength: 245N/mm<sup>2</sup>
- Application: Scaffolding
- Diameter: 48.3mm
- Thickness: 3.2mm
- Material: Galvanised Steel
- Highlight: **3.2mm Thickness Scaffold Tube, Construction Scaffold Tube 6.4kg/M**

## Product Description

### Versatile Scaffold Tube With 3.2mm Thickness And 6.4kg/M For Construction

#### Product Description:

Galvanised Scaffold Tube - The Ultimate Solution for Construction Projects

Galvanised Scaffold Tube is a high-quality steel and pipe product that is specifically designed for use in construction projects. Made from galvanized steel, it is known for its durability, versatility, and safety. With a thickness of 3.2mm and a diameter of 48.3mm, it is the perfect choice for all your scaffolding needs.

##### Material and Strength

Our Galvanised Scaffold Tube is made from high-quality galvanized steel, ensuring its strength and durability. With a yield strength of 245N/mm<sup>2</sup> and a tensile strength of 420N/mm<sup>2</sup>, it can withstand heavy loads and provide the necessary support for your construction projects. This makes it ideal for use in scaffolding systems.

##### BS1139 Scaffolding Tube Standard

The Galvanised Scaffold Tube conforms to the BS1139 standard, which is the industry standard for scaffolding tubes. This ensures that the tube is of the highest quality and meets all safety requirements. With this certification, you can trust that our product is reliable and safe to use in your construction projects.

##### Versatility and Durability

The Galvanised Scaffold Tube is designed to be versatile and can be used in various construction projects. It is suitable for both indoor and outdoor use, making it a perfect choice for all types of construction work. Its galvanized coating also makes it resistant to corrosion, ensuring its durability and longevity.

##### Easy to Use and Assemble

Our Galvanised Scaffold Tube is easy to use and assemble, making it the go-to choice for construction workers. With its standard dimensions, it can easily fit into any scaffolding system, providing a stable and safe platform for workers to perform their tasks. The galvanized coating also makes it smooth and easy to handle, reducing the risk of accidents and injuries.

##### Ensuring Safety on Construction Sites

Safety is a top priority in any construction project, and our Galvanised Scaffold Tube is designed to meet the highest safety standards. With its strength and stability, it provides a secure working platform for workers, reducing the risk of accidents and injuries. Its galvanized coating also makes it non-slip, providing a safe and secure grip for workers.

##### Conclusion

In conclusion, Galvanised Scaffold Tube is an essential product for any construction project. With its high-quality galvanized steel and adherence to industry standards, it provides the necessary strength, durability, and safety for all your scaffolding needs. So why wait? Choose Galvanised Scaffold Tube for your next construction project and experience the difference.

#### Technical Parameters:

Attribute	Value
Name	Galvanised Scaffold Tube
Standard	EN39
Surface Treatment	Galvanised
Tensile Strength	420N/mm <sup>2</sup>
Thickness	3.2mm
Weight	6.4kg/m
Material	Galvanised Steel
Diameter	48.3mm
Application	Scaffolding
Yield Strength	245N/mm <sup>2</sup>
bs1139 scaffolding tube	Galvanised Scaffold Tubes
pipe scaffold tube	Galvanised Scaffold Tubes

#### Applications:

Galvanised Scaffold Tube - Bythai Scaffolding

The Galvanised Scaffold Tube, manufactured by Bythai Scaffolding in China, is a highly versatile and durable product that is widely used in various industries, especially in construction and building projects. It is designed to provide strong support and ensure safety in any construction site.

##### Product Attributes

##### Application and Usage

The Galvanised Scaffold Tube is widely used in various construction and building projects as a support structure. It is commonly used for scaffolding, which is essential in providing workers a safe and stable platform to work on. It is also used as a temporary structure for

maintenance, repairs, and renovations of buildings. Other common applications include:

- Bridge construction and maintenance
- High-rise building construction
- Roofing and ceiling installations
- Facade and window cleaning
- Signage and billboard installations
- Temporary stages and platforms for events
- Industrial and commercial maintenance projects

Product Features

The Galvanised Scaffold Tube offers various features that make it a popular choice in the construction industry:

**Stainless Steel Material:** Made of high-quality stainless steel, it is strong, durable, and resistant to corrosion, ensuring long-term use.

**Flexible and Versatile:** The 48.3mm diameter of the tube makes it suitable for various applications, providing flexibility and versatility in its usage.

**Easy Installation:** It can be easily assembled and disassembled, making it convenient to use in different construction sites.

**Safety and Durability:** The Galvanised Scaffold Tube has a high tensile strength of 420N/mm<sup>2</sup>, ensuring safety and stability for workers and materials.

**Cost-Effectiveness:** The galvanised surface treatment makes the tube resistant to rust and corrosion, reducing maintenance and replacement costs in the long run.

Overall, the Galvanised Scaffold Tube is a reliable and cost-effective product that provides essential support and safety in construction projects. With its durable material and versatile usage, it has become a popular choice for builders and contractors worldwide.

## Customization:

Galvanised Scaffold Tube - Customization Service

Brand Name: Bythai Scaffolding

Place of Origin: China

Certification: SGS

Price: \$5-\$18

Packaging Details: In bundles

Delivery Time: 7-15 days

Payment Terms: TT/LC

Supply Ability: 1000tons per month

Tensile Strength: 420N/mm<sup>2</sup>

Diameter: 48.3mm

Material: Galvanised Steel

Name: Galvanised Scaffold Tube

Surface Treatment: Galvanised

Galvanised Scaffold Tube is a highly customizable product offered by Bythai Scaffolding. Our Model Number BT01 is made with high-quality galvanised steel material, ensuring durability and strength. With a tensile strength of 420N/mm<sup>2</sup> and a diameter of 48.3mm, our galvanised scaffold tubes are perfect for use as steel tubes, scaffolding tubes, scaffolding pipes, and galvanized tubes.

We take pride in our place of origin, China, and our SGS certification is a testament to our commitment to providing top-quality products. Our galvanised scaffold tubes can be customized according to your specific requirements, including packaging details, delivery time, and payment terms. We offer competitive prices, ranging from \$5 to \$18 per tube, and have a supply ability of 1000tons per month.

Trust Bythai Scaffolding for all your galvanised scaffold tube needs. Contact us now to learn more about our customization services.

## Packing and Shipping:

Galvanised Scaffold Tube Packaging and Shipping

Our Galvanised Scaffold Tube is carefully packaged and shipped to ensure safe delivery to our customers. Here is our packaging and shipping process:

### 1. Packaging Process

Each Galvanised Scaffold Tube is first wrapped in a protective layer to prevent any scratches or damage during transportation. Then, they are placed in sturdy bundles and secured with steel straps to keep them from shifting or coming apart.

Next, the bundles are packed in strong and durable wooden crates to provide additional protection and stability. Each crate is labeled with the product name, size, and quantity for easy identification.

### 2. Shipping Process

We offer both domestic and international shipping options for our Galvanised Scaffold Tube.

For domestic shipping, we use reputable carriers to ensure timely delivery. Our tubes are loaded onto trucks or trailers and transported to the designated destination.

For international shipping, we work with trusted freight forwarders and shipping companies to ensure smooth and efficient delivery. Our tubes are carefully loaded into shipping containers and shipped via sea or air freight, depending on the customer's preference.

Once the shipment is on its way, we provide our customers with a tracking number to monitor their order's progress and estimated delivery date.

At Galvanised Scaffold Tube, we take great care in our packaging and shipping process to ensure that our customers receive their

products in perfect condition.
