Product Description

Product Description:

Adjustable Steel Prop

The Adjustable Steel Prop is a must-have product for any construction project. Made from high-quality steel, it is designed to provide reliable and durable support for building pillars. Its adjustable height feature makes it versatile and suitable for various construction needs.
Material

Our Adjustable Steel Prop is made from high-quality steel, ensuring its strength and durability. This makes it a reliable choice for supporting building structures during construction.
Feature

The most prominent feature of our Adjustable Steel Prop is its adjustability. With this feature, it can be easily adjusted to different heights, making it suitable for various construction needs. This also makes it a cost-effective option, as it eliminates the need for multiple props of different heights.
Color

The Adjustable Steel Prop comes in a sleek and modern silver color. This not only adds to its aesthetic appeal but also makes it easy to spot on a construction site.
Size

Our Adjustable Steel Prop comes in a standard size, making it compatible with most construction projects. Its compact size also makes it easy to transport and store.
Height

The most unique and useful feature of our Adjustable Steel Prop is its adjustable height. It can be extended and adjusted to provide support at different levels, making it suitable for a wide range of construction needs.
Overall, the Adjustable Steel Prop is a reliable and durable product that is essential for any construction project. Its adjustability, sleek design, and high-quality material make it a top choice for building pillars and providing support during construction.

Technical Parameters:

Material	Steel
Surface Treatment	HDG
Steel Props Price	Varies based on size and quantity
Light Duty Steel Prop	Lightweight and easy to handle, suitable for smaller construction projects
Scaffolding Steel Prop Tripod	Provides stability and support for scaffolding systems

Applications:

Adjustable Steel Prop - The Ideal Support for Your Construction Site

When it comes to construction sites, safety and stability are of utmost importance. That's why you need a reliable and durable support system to ensure the integrity of your building. And that's where scaffolding steel prop comes in.
Brand Name: Scaffolding Steel Prop

Our brand name says it all - we specialize in providing high-quality scaffolding steel props that are built to last. Our products are made from premium quality steel and are designed to provide maximum support and stability for your construction projects.
Place of Origin: China Tianjin

Our scaffolding steel props are manufactured in China Tianjin, a city known for its advanced technology and high-quality steel production. This ensures that our products are of the highest quality and meet international standards.
Minimum Order Quantity: 1000

We understand that construction projects require a large quantity of support pillars, that's why our minimum order quantity is 1000 pieces. This ensures that you have enough scaffolding steel props to support your building and complete your project without any delays.
Price: 4.5-8.5

Our scaffolding steel props are competitively priced at 4.5-8.5 per piece. We believe in providing high-quality products at affordable prices, making it accessible to all construction companies, big or small.
Delivery Time: 10-25

We understand the importance of timely delivery in the construction industry. That's why we strive to deliver your scaffolding steel props within 10-25 days. This ensures that your project stays on track and is completed within the scheduled timeline.
Height: Adjustable

One of the key features of our scaffolding steel props is their adjustable height. This allows you to use them for various types of construction projects, whether it's a single-story building or a multi-story skyscraper. You can easily adjust the height to suit your specific needs.
Function: Support

The main function of our scaffolding steel props is to provide support and stability to your construction site. They act as tripod pillars, supporting the weight of the building and ensuring that it stays upright and safe for workers and passersby.
Surface Treatment: HDG

To ensure the longevity of our scaffolding steel props, we use hot-dip galvanization (HDG) as the surface treatment. This process involves coating the steel with a layer of zinc, making it more resistant to corrosion and extending its lifespan.
Color: Silver

Our scaffolding steel props come in a sleek silver color, making them easy to spot on a construction site. This also adds a professional touch to your project and enhances its overall aesthetic appeal.
Size: Standard

Our scaffolding steel props are available in a standard size, making them compatible with most construction projects. This allows you to use them for various projects without worrying about compatibility issues.
Conclusion

Scaffolding steel props are an essential component of any construction site. They provide the necessary support and stability to ensure the safety of the workers and the integrity of the building. With its adjustable height, durable construction, and competitive pricing, our scaffolding steel props are the ideal choice for your construction needs. So, choose our brand and experience the difference in your construction projects. Contact us today to place your order!

Packing and Shipping:

Packaging and Shipping of Adjustable Steel Prop

The Adjustable Steel Prop is carefully packaged and shipped to ensure its safe arrival at the destination. The packaging is designed to protect the product from any damage during transportation and storage.

Packaging:

The Adjustable Steel Prop is first wrapped in a layer of protective material, such as bubble wrap or foam, to prevent scratches and dents.

It is then placed in a sturdy cardboard box or wooden crate, which is specifically designed to hold and protect the prop.

The box or crate is sealed with strong tape to secure its contents and prevent any shifting during transit.

For larger orders, the Adjustable Steel Prop may be palletized for easier handling and transportation.

Shipping:

The Adjustable Steel Prop is shipped using a reliable and efficient method to ensure timely delivery. The shipping method may vary depending on the destination, size, and weight of the order.

For domestic orders, the prop may be shipped via ground transportation or expedited delivery services.

For international orders, the prop may be shipped via air or sea freight.

The shipping costs will be calculated based on the destination and weight of the order.

Once the order is shipped, the customer will receive a tracking number to monitor the delivery status of their Adjustable Steel Prop. Our team will also closely monitor the shipping process to ensure a smooth and timely delivery.

With our careful packaging and reliable shipping methods, we guarantee that the Adjustable Steel Prop will arrive at its destination in perfect condition, ready for immediate use.
