

## EN74-1 Standard Steel Scaffolding Coupler within scaffolding pipe coupler

Our Product Introduction

for more products please visit us on [bythaiscaffold.com](http://bythaiscaffold.com)

### Basic Information

- Place of Origin: china tianjin
- Brand Name: scaffolding coupler
- Certification: SGS
- Model Number: BM201
- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 15-25
- Payment Terms: TT/TC

### Product Specification

- Material: Steel
- Application: Construction
- Color: Silver
- Package: Container
- Feature: High Strength
- Surface Treatment: Galvanized
- Standard: EN74-1
- Name: Scaffolding Coupler

## Product Description

### Product Description:

Scaffolding Coupler: Your Ultimate Choice for Safe and Secure Scaffold Connections

Are you looking for a reliable and durable solution for connecting scaffolding pipes? Look no further than Scaffolding Coupler - the perfect choice for your scaffold and structure connection needs.

Made from high quality Japanese steel, Scaffolding Coupler is designed to provide a strong and secure connection between scaffolding pipes. The silver color of the coupler adds a sleek and professional touch to your scaffolding structure.

With the safety of workers being our top priority, Scaffolding Coupler is manufactured in accordance with the EN74-1 standard, ensuring the highest level of safety and quality. Its durable design allows it to withstand heavy loads and harsh weather conditions, making it a long-lasting solution for your scaffolding needs.

Key Features:

Made from high quality Japanese steel

Strong and secure connection

Sleek silver color

Manufactured in accordance with EN74-1 standard

Durable and long-lasting

Scaffolding Coupler is the perfect choice for connecting scaffolding pipes in a variety of industries such as construction, maintenance, and renovation. Its versatility and reliability make it an essential tool for any scaffolding project.

Package and Delivery:

Scaffolding Coupler is packed in containers to ensure safe and convenient transportation. Our efficient delivery system ensures that your order reaches you in a timely manner, allowing you to start your project without any delays.

Don't compromise on the safety and stability of your scaffolding structure. Choose Scaffolding Coupler for a high quality, durable, and secure connection. Contact us today to place your order!

**Technical Parameters:**

Product Name	Scaffolding Coupler
Standard	EN74-1
Material	Steel
Surface Treatment	Galvanized
Feature	High Strength
MOQ	1000
Package	Container
Color	Silver
Application	Construction
Key Words	Steel Structure Scaffold Connectors, Scaffold Beam Connectors, British Coupler Manufacturers

**Applications:**

Scaffolding Coupler: A Must-Have Tool for Construction Projects

Coupler scaffolding is an essential tool for any construction project. It is a type of scaffolding that is used to connect two steel pipes together to create a stable and secure structure. The scaffolding coupler, also known as a scaffold clamp, is an important component of scaffolding systems and is used to join different parts of the scaffolding together.

The Scaffolding Coupler BM201 is a high-quality product manufactured in China by Tianjin, a well-known hub for construction tools and equipment. It is designed to meet the needs of construction workers and is widely used in various construction projects around the world.

**Application and Usage**

The Scaffolding Coupler BM201 is suitable for a variety of uses, including building construction, maintenance, and repair work. It is commonly used in the construction of buildings, bridges, and other structures. This product is also used for temporary support in areas where scaffolding is needed, such as for painting, cleaning, or installing equipment.

**Features and Benefits**

The Scaffolding Coupler BM201 is made of high-quality Japanese steel, ensuring its durability and strength. It is designed to meet the EN74-1 standard, making it a reliable and safe choice for construction projects. The coupler is also lightweight, making it easy to handle and transport.

This coupler is highly versatile and can be used with different types of scaffolding pipes, including steel, aluminum, and wooden pipes. It is designed to securely connect two pipes at a 90-degree angle, providing stability and strength to the scaffolding structure.

**Packaging and Delivery**

The Scaffolding Coupler BM201 comes in bundles, making it convenient for transport and storage. It can be packed in containers,

ensuring safe delivery to the construction site. The delivery time for this product is 15-25 days, depending on the quantity ordered.

#### **Pricing and Payment Terms**

The price of the Scaffolding Coupler BM201 ranges from 4.5 to 8.5, depending on the quantity ordered. The price may also vary based on the destination and shipping method. The payment terms for this product are TT/TC, providing flexibility for customers to choose their preferred payment method.

#### **Certification**

The Scaffolding Coupler BM201 is certified by SGS, a globally recognized certification agency. This ensures that the product meets the necessary quality and safety standards required for construction projects.

#### **Conclusion**

The Scaffolding Coupler BM201 is a high-quality, durable, and safe product that is essential for any construction project. Its versatility and reliability make it a popular choice among construction workers around the world. With its JIS Standard Couplings and Japanese Steel Pipe Connectors, this coupler is a must-have for any scaffolding system. So, if you are looking for a reliable and efficient scaffolding coupler, the Scaffolding Coupler BM201 is the perfect choice for you!

## **Customization:**

Scaffolding Coupler - Customization Services

Brand Name: Scaffolding Coupler

Model Number: BM201

Place of Origin: China Tianjin

Certification: SGS

Price: \$4.5-8.5

Packaging Details: In bundles
