Product Description

Product Description:

Scaffolding Coupler

Scaffolding Coupler is a manual scaffold connection tool used in the construction industry for connecting two or more scaffolding pipes together. It is an essential component in building scaffolding structures and ensures the safety and stability of the entire structure. Our couplers are designed to meet the BS1139 standard and are compatible with BS EN 74 scaffold accessories.

Surface Treatment

Our scaffolding coupler is coated with a layer of galvanized finish, providing it with excellent corrosion resistance and durability. This surface treatment also gives the coupler a smooth and polished silver appearance, making it aesthetically pleasing and easy to clean.

Color

The scaffolding coupler is silver in color, giving it a professional and industrial look. This color is achieved through the galvanization process and adds to the overall durability and quality of the product.

Package

All our scaffolding couplers are packaged in containers, ensuring safe and efficient transportation to our customers. This packaging method also protects the couplers from any external damage, ensuring that they arrive in perfect condition.

Material

Our scaffolding couplers are made from high-quality steel, providing them with superior strength and durability. They are able to withstand heavy loads and harsh environmental conditions, making them suitable for use in a variety of construction projects.

Technical Parameters:

Technical Parameters	Description
Package	Container
Material	Steel
Surface Treatment	Galvanized
Color	Silver
Application	Construction
Feature	High Strength
Name	Scaffolding Coupler
MOQ	1000
