# Hot dip Galvanized Ringlock System Scaffolding Q235 Steel Architecture Scaffold

Our Product Introduction

## Basic Information

- Place of Origin: Tianjin China
- Brand Name: Bythai
- Certification: SGS
- Model Number: BM202
- Minimum Order Quantity: 1000
- Price: 40.5-85.5
- Packaging Details: In bundles
- Delivery Time: 10-15
- Payment Terms: TT/TC

## Product Specification

- Product Name: Ringlock System
- Application Scenarios: Architecture
- Material: Q235 Steel
- Surface Treatment: Hot-dip Galvanized
- Warranty: 2 Years
- Shipping Origin: China
- Highlight: **Architecture Ringlock System Scaffolding**, **Q235 Ringlock System Scaffolding**, **Hot dip Galvanized Ringlock System Scaffolding**

## Product Description

### Product Description:

The Ringlock System Scaffolding is a state-of-the-art, versatile scaffold solution, originating from the bustling industrial hub of Tianjin, China. Designed to meet the rigorous demands of construction, industrial maintenance, and event staging, this product is not only robust but also boasts a myriad of features that set it apart in the highly competitive scaffolding market. The Ringlock System is crafted from high-quality Q235 Steel, known for its strength and durability, ensuring that the structure can withstand the pressures and loads of various construction sites and environments.

One of the standout attributes of this scaffolding system is its compliance with Compliant Scaffolding Standards. These standards guarantee the safety and reliability of the Ringlock System, providing peace of mind to construction professionals and workers alike. Safety is paramount in any construction or maintenance endeavor, and this product delivers it without compromise. Each component of the Ringlock System has been meticulously engineered to adhere to these stringent standards, ensuring that each assembly is safe for use in any project.

The material used in the construction of this scaffolding system, Q235 Steel, is renowned for its structural integrity and resilience. This material is the backbone of the Ringlock System, providing the necessary support for heavy-duty use. The Q235 Steel is subjected to a thorough hot-dip galvanizing process, which not only enhances the lifespan of the scaffold by making it a Corrosion-Resistant Ringlock but also ensures its continuous performance in harsh weather conditions. The hot-dip galvanizing process provides a thick, durable coating that is far superior to other surface treatments, making it an ideal choice for both indoor and outdoor applications.

The hot dip galvanized ringlock scaffolding system is not only strong but also incredibly flexible. It is designed to offer numerous configuration options, making it a versatile solution for a variety of structural shapes and sizes. This adaptability is critical in today's ever-evolving construction industry, where each project presents its unique challenges and requirements. With the Ringlock System Scaffolding, adapting to complex geometries or design changes is hassle-free, allowing for increased efficiency and decreased downtime on the worksite.

Shipping from China, the Ringlock System Scaffolding is easily transportable and can be shipped worldwide to meet the needs of international clients. The strategic location of Tianjin, China, as the shipping origin, ensures that logistics are streamlined, thereby reducing transit times and ensuring prompt delivery of the scaffolding system to global destinations.

Furthermore, the manufacturer stands behind the quality of the Ringlock System Scaffolding with a 2-year warranty. This warranty underscores the confidence in the product's performance and serves as a commitment to quality, ensuring that customers can trust in the long-term reliability and serviceability of their investment. Should any issues arise within the warranty period, clients are assured of support and remediation, further adding to the product's value proposition.

In summary, the Ringlock System Scaffolding from Tianjin, China, is a premier choice for any construction or maintenance project. Its composition of high-grade Q235 Steel, compliance with Compliant Scaffolding Standards, and the robust hot-dip galvanized surface treatment combine to create a Corrosion-Resistant Ringlock system that is built to last. With versatile configurations, a global shipping capability, and a solid 2-year warranty, this scaffolding system is set to be the backbone of countless successful projects around the world.

### Technical Parameters:

| Technical Parameter | Description |
|---|---|
| Shipping Origin | China |
| Product Name | Ringlock System |
| Warranty | 2 Years |
| Material | Q235 Steel |
| Application Scenarios | Architecture |
| Surface Treatment | Hot-dip Galvanized |
| Place of Origin | Tianjin, China |
| Key Features | Ringlock rosette, Compliant Scaffolding Standards, Ringlock Scaffold Connector |

### Applications:

The Bythai Ringlock System Scaffolding, with its model number BM202 originating from China, is a quintessential tool in modern construction and architectural applications. This system is highly regarded for its innovative Ring Lock design which ensures easy assembly and disassembly, providing a secure and stable structure for a diverse range of projects. The BM202 is certified by SGS, ensuring it meets the highest compliant scaffolding standards, which is critical for the safety and efficiency of construction works.

The Ringlock System is designed to be versatile, and it is suitable for various application occasions such as commercial and residential building construction, bridge and tunnel projects, renovation works, and large-scale event staging. The innovative Ringlock Scaffold Connector is a key feature that simplifies the connection process, allowing for a swift setup which is essential in keeping projects on schedule. The system's hot-dip galvanized surface treatment ensures durability and resistance to the elements, making it ideal for both indoor and outdoor use.

Bythai's BM202 model is competitively priced between  4.5-8.5, and it is packed in bundles for efficient transportation and storage. With a delivery time of 10-15 days, the Ringlock System Scaffolding can be promptly available on-site, ensuring that project timelines are adhered to. The payment terms are convenient, offering TT/TC options to suit different customer preferences. Shipping from China, the Bythai BM202 arrives ready to be deployed in a variety of construction scenarios.

Safety is paramount in construction, and the Ringlock System upholds this by being compliant with scaffolding standards. Its robust design and the two-year warranty further affirm its reliability and the manufacturer's confidence in its product. Whether undertaking a small-scale renovation or a large infrastructure project, the Bythai BM202 Ringlock System Scaffolding is an indispensable solution that promises efficiency, safety, and versatility in architecture and construction.
