Product Description

Product Description:

The length of the Steel Plank Ringlock Scaffolding can be customized according to your specific requirements, making it a versatile option for any project. Whether you need a short or long platform, this scaffolding plank can be adjusted to suit your needs.

The surface of the Steel Plank Ringlock Scaffolding comes in three different options: pre-galvanized, hot dip galvanized, or spray plastic.

The pre-galvanized option provides a layer of protection against rust and corrosion, ensuring the longevity of the product. The hot dip galvanized option goes a step further and provides a thicker coating of zinc, making it even more resistant to corrosion. The spray plastic option adds an extra layer of protection and makes the scaffolding plank more visible, ensuring safety on the job site.

This galvanized steel scaffolding plank is specially designed for use in ringlock scaffolding systems, making it easy to install and remove. The steel planks w/hook design ensures that the scaffolding plank stays securely in place, providing a safe and stable working platform for construction workers.

The Steel Plank Ringlock Scaffolding is packaged in containers, making it easy to transport and store. It is a cost-effective solution for any construction project that requires a safe and reliable working platform at height.

Technical Parameters:
