

Robust Galvanized Steel Scaffold Tubes for Long Term Durability in Construction

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: China
- Brand Name: Bythai Scaffolding
- Certification: SGS
- Model Number: BT01
- Price: \$5-\$18
- Packaging Details: In bundles
- Delivery Time: 7-15 days
- Payment Terms: TT/LC
- Supply Ability: 1000tons per month

Product Specification

- Yield Strength: 245N/mm2
- Name: Galvanised Scaffold Tube
- Material: Galvanised Steel
- Tensile Strength: 420N/mm2
- Diameter: 48.3mm
- Application: Scaffolding
- Standard: EN39
- Thickness: 3.2mm
- Load Capacity: Heavy Duty
- Surface: Galvanised
- Easy To Assemble: Yes
- Adjustable Length: 3m, 5.8m, 6.0m Or As Your Request
- Bending Radius: $\geq 5D$

Product Description

Product Description:

Built to Endure: Robust Galvanized Steel Scaffold Tubes for Long-Term Durability

Invest in lasting performance for your construction projects with our robust galvanized steel scaffold tubes! Engineered for exceptional strength and protected against the elements, these tubes guarantee a reliable and secure scaffolding foundation for projects of any duration.

Unwavering Strength for Long-Lasting Projects:

High-Quality Steel Construction: Manufactured from premium-grade steel, these tubes provide exceptional load-bearing capacity, ensuring unwavering support for even the most demanding construction projects.

Hot-Dip Galvanized Finish: The hot-dip galvanization process creates a robust zinc coating that shields the tubes from rust and corrosion. This ensures long-lasting performance, minimizing replacements and maximizing the lifespan of your scaffolding system.

Built to Withstand the Test of Time:

Durable for Long-Term Use: The hot-dip galvanized finish protects the tubes from harsh weather conditions, extending their lifespan and reducing the need for frequent replacements. Invest in a product that delivers lasting value for your construction needs.

Reduced Maintenance Requirements: The protective zinc coating minimizes the need for regular maintenance, allowing you to focus on project completion without weather-related delays.

Safety and Efficiency You Can Trust:

Stable Platform Construction: The robust design and exceptional strength of our galvanized steel tubes contribute to a stable and secure scaffolding platform, prioritizing worker safety at elevated heights.

Compliance with Safety Standards: Our tubes adhere to rigorous safety regulations for construction projects, ensuring project compliance and worker well-being.

Streamlined Assembly and Disassembly: The user-friendly design allows for quick and efficient setup and dismantling of your scaffolding system, saving valuable time and labor costs on long-term projects.

Additional Benefits:

Versatile Applications: Our galvanized steel tubes seamlessly integrate with various scaffolding components, enabling you to create configurations for diverse construction needs, regardless of project duration.

Cost-Effective Investment: The long lifespan and minimal maintenance requirements of our tubes translate to significant cost savings over time, making them a cost-effective choice for long-term construction projects.

Reduced Environmental Impact: By minimizing replacements and extending the lifespan of the scaffolding system, you contribute to a more sustainable construction environment.

Ideal Applications for Robust Galvanized Steel Scaffold Tubes:

Long-term construction projects of varying scales.

Scaffolding for complex renovations and infrastructure repairs.

Building maintenance projects requiring extended platform access.

Creating a durable foundation for industrial and commercial scaffolding systems.

And many more applications demanding long-lasting performance!

Invest in a Scaffolding Solution Built to Last:

Don't settle for temporary solutions. Our robust galvanized steel scaffold tubes provide the exceptional strength, durability, and weather resistance you need for long-term construction projects. Choose a reliable foundation for your success and maximize your return on investment.

Contact us today to explore our selection of robust galvanized steel scaffold tubes and find the perfect solution for your next long-term project!

Technical Parameters:

Parameter	Value
Name	Galvanised Scaffold Tube
Diameter	48.3mm
Thickness	3.2mm
Weight	6.4kg/m
Material	Galvanised Steel
Application	Scaffolding
Standard	EN39
Surface Treatment	Galvanised
Yield Strength	245N/mm2
Tensile Strength	420N/mm2

Galvanised Scaffold Tube is a type of building scaffolding pipes used in tube and coupler scaffolding systems. Made of galvanised steel, it has a diameter of 48.3mm and a thickness of 3.2mm. The tube weighs 6.4kg/m and has a yield strength of 245N/mm2 and a tensile strength of 420N/mm2. It is standardised under EN39 and has a galvanised surface treatment for added durability and corrosion resistance.

Applications:

Galvanised Scaffold Tube: The Ultimate Building Support Solution

Brand Name: Bythai Scaffolding

Model Number: BT01

Place of Origin: China
Certification: SGS
Price: \$5-\$18
Packaging Details: In bundles
Delivery Time: 7-15 days
Payment Terms: TT/LC
Supply Ability: 1000tons per month
Material: Galvanised Steel
Yield Strength: 245N/mm2
Tensile Strength: 420N/mm2
Surface Treatment: Galvanised

Customization:

Galvanised Scaffold Tube Customization Service

Brand Name: Bythai Scaffolding
Model Number: BT01
Place of Origin: China
Certification: SGS
Price: \$5-\$18
Packaging Details: In bundles
Delivery Time: 7-15 days
Payment Terms: TT/LC
Supply Ability: 1000tons per month
Surface Treatment: Galvanised
Weight: 6.4kg/m
Material: Galvanised Steel
Tensile Strength: 420N/mm2
Standard: EN39
Key Features:

Scaffolding steel tube with galvanised surface treatment for durability and rust resistance

Model number BT01 for easy identification and compatibility with Bythai Scaffolding systems

Certified by SGS for quality assurance

Competitive price range of \$5-\$18 per tube

Secure packaging in bundles for safe transportation and storage

Fast delivery time of 7-15 days

Flexible payment options of TT or LC

High supply ability of 1000tons per month for bulk orders

Lightweight design with a weight of 6.4kg/m for easy handling and installation

Made from galvanised steel for strength and durability

Tensile strength of 420N/mm2 for reliable support and stability

Conforms to standard EN39 for quality and safety

Customization Options:

Custom lengths and sizes available according to customer requirements

Option to add scaffold tube caps for added protection and safety

Branding and logo customization available for bulk orders

Trust Bythai Scaffolding for all your scaffolding steel tube needs. Our galvanised scaffold tubes provide the perfect combination of strength, durability, and affordability for your construction projects. Contact us now to learn more and place your order.

Support and Services:

Technical Support & Service

At Galvanised Scaffold Tube, we pride ourselves on providing top-quality products and exceptional customer service. Our technical support and service team is dedicated to ensuring that our customers have all the resources they need to successfully use our scaffold tubes.

Technical Support

Our technical support team is available to assist with any questions or concerns you may have regarding our Galvanised Scaffold Tube products. We can guide proper installation, usage, and maintenance of our scaffold tubes. Our team is also knowledgeable about safety regulations and can offer advice on how to comply with them.

If you encounter any issues while using our products, our technical support team is here to help. We can troubleshoot and provide solutions to any problems you may encounter. We are committed to ensuring that our customers have a smooth and successful experience with our scaffold tubes.

Service

In addition to our technical support, we also offer exceptional customer service to ensure a positive experience for our customers. Our service team is available to answer any questions and assist with any issues you may have. We are committed to responding promptly and providing effective solutions to any concerns you may have.

We also offer a warranty on all of our Galvanised Scaffold Tube products, providing our customers with peace of mind and ensuring the quality of our products. If you encounter any issues with our products, our service team will work with you to resolve them quickly and efficiently.

At Galvanised Scaffold Tube, we value our customers and strive to provide the best technical support and service in the industry. We are dedicated to ensuring that our customers have a positive experience with our products and are always available to assist with any questions or concerns. Thank you for choosing Galvanised Scaffold Tube.

FAQ:

Q: What is the brand name of this product?

A: The brand name of this product is Bythai Scaffolding.

Q: What is the model number of this product?

A: The model number of this product is BT01.

Q: Where is this product manufactured?

A: This product is manufactured in China.

Q: Does this product have any certification?

A: Yes, this product is certified by SGS.

Q: What is the price range for this product?

A: The price for this product ranges from \$5 to \$18.

Q: How is this product packaged?

A: This product is packaged in bundles.

7. Q: How long does it take for this product to be delivered?

A: The delivery time for this product is 7-15 days.

8. Q: What are the payment terms for this product?

A: The payment terms for this product are TT (Telegraphic Transfer) or LC (Letter of Credit).

9. Q: What is the supply ability of this product?

A: The supply ability of this product is 1000 tons per month.
